Napa, CA

Here is another interesting patient seen in my practice today.

29 year old female.

Health History:

32 weeks pregnant

allegria- occasionally for seasonal allergies

no history of decay

last BWX 1/31/02 showed normal bone level

Homecare:

past: brush 2 x day, floss 1 x day

last 4 months: brush 3 x day, floss occasionally

Presented with very sensitive gingiva. Complains of soreness when flossing and bleeding during brushing.

exam revealed generalized 2 - 4 mm pockets with generalized BOP. Also spontaneous bleeding in 5 sites. Granulomas present in 5 sites.

Pictures of two sites are included.

What is your diagnosis and treatment plan?
